EASY APPOINTMENTS PREMIUM

V1.0.1

1. WELCOME

The **EasyAppointments PREMIUM** monthly subscription will allow you to charge more to your customers for the use of the EasyAppointments module as it extends its power by allowing class bookings, Google Calendar Sync and partial/full payment for appointments.

In order to support payments, the Enterprise Payments module will have to be added to your App. It's a free module in its base version and it supports bank transfers, cash, Stripe and Paypal. It's available from the Siberian marketplace.

Please note that payments for classes are not yet available but will also be available at some point in the near future.

If the subscription is cancelled, the EasyAppointments base module will still work but the PREMIUM features will be deactivated.

2. SETUP

The **EasyAppointments PREMIUM** subscription requires no installation. It requires only that you already have the EasyAppointments Base module installed on your SiberianCMS and that your activate your subscription key. The PREMIUM features of the EasyAppointments module will show you an upgrade message if the license key is not activated for your App (figure 2.A.1).

Figure 2.A.2 – Appointments activation page

Once you purchase the **EasyAppointments PREMIUM** subscription you'll need to activate it from your Siberian backoffice. The subscription key that you received in the purchase email will need to be added under Manage > Modules > Appointment Activation Key (figure 2.A.2).
