

# XDELIVERY BUGS AND IMPROVEMENTS

## 01) DATE/TIME BUG [BUG]

Just want to point out a small **Date format bug**. Even though I selected **MM-DD-YYYY**, on the Checkout page, it still shows **DD-MM-YYYY**.

The screenshot displays a checkout form with the following sections and fields:

- Date & Time Format**
  - Time Format \*: 12-hour format
  - Date Format \*: 12.02.2021
- External Field**
  - Company Address: Disable
  - SDI: Disable
  - PEC: Disable
  - Cod Fiscale: Disable

A **Save** button is located at the bottom right of the form.

The **Confirm** sidebar on the right shows the following details:

- Total Amount: \$16.30
- Delivery/Pick-up Date and Time: Sat, 4th December, 2021
- Address: Michael James, 000-000-0000, 221 E 78 St, New York, Bronx, 10457
- Select Payment Method: Wallet (Pay with Wallet), Cash On Delivery (Pay with cash upon delivery)

Red arrows indicate the discrepancy between the selected 'Date Format' of '12.02.2021' and the displayed date 'Sat, 4th December, 2021' in the sidebar.

---

Hello ,

## You have received new order!

2nd Dec, 2021 5:45 PM

---

### Notes

Deliver to my porch.,

---

### Items

Music Album	USD14.99

---

### Payment Summary

Subtotal	USD14.99
Tax	USD1.31
Delivery Price	USD4.99

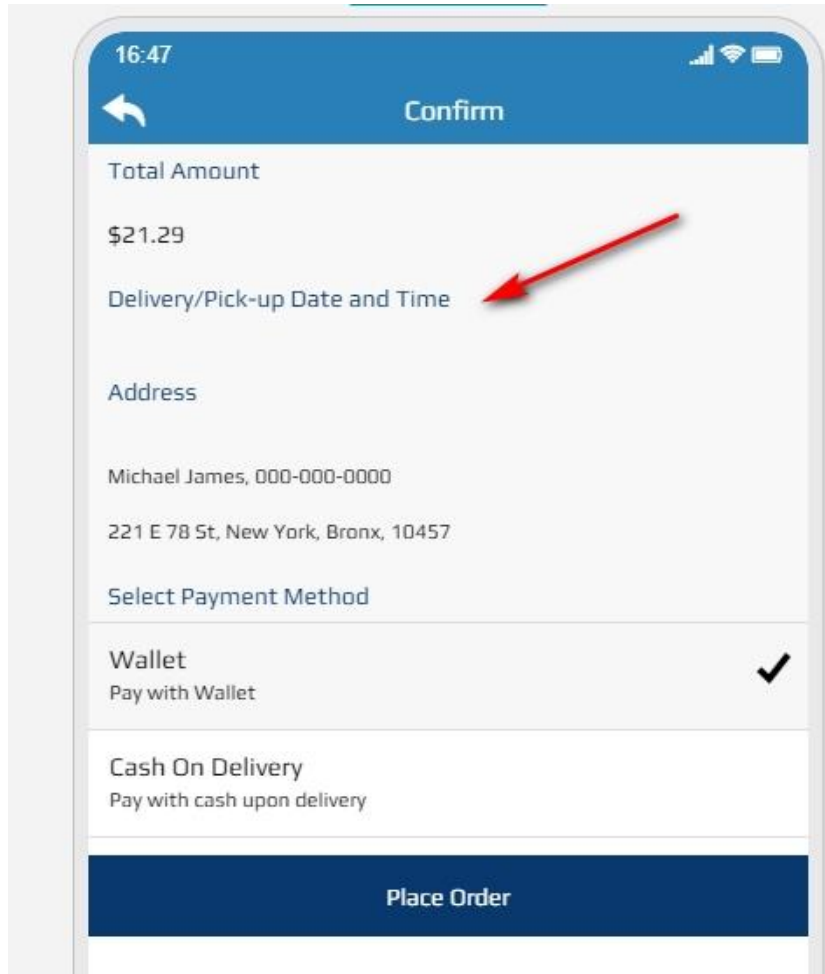

---

Net Amount	<b>USD21.29</b>
------------	-----------------

---

## 02) DELIVERY/PICK-UP DATE AND TIME IS DISABLED [IMPROVEMENT]

When the **Delivery and Pick-up Times are disabled**, the **field should be hidden** on the **Checkout screen**. This way, the App User isn't confused when they're viewing the screen and that section is empty. See the attached screenshot...

### 03) TRACKING NUMBER / MISC ORDER INFO [IMPROVEMENT]

Currently (and this is very important), the App Admin doesn't have a way to **update the Order with the Tracking Number** (or other important info) that is relevant to the Order.

The **Order Details screen** in the **Editor** should have **at least one Text Field** that enables the App Admin to update the Order with this information.

Likewise, in the **module Settings**, the Text Field should have an option that the App Admin can name the Field as he/she sees fit. This way the Field can be tailored to their particular business. There should also be an **option to enable/disable the feature** in case it's not needed.

Any information added to the Field should **appear in the Customer's Order Details screen**.

## 04) STORE HOURS DOESN'T WORK [BUG]

The **Store Hours do not work**. If attempting to order during the hours that the store is closed, the module should not allow the order to be placed. Instead, when attempting to add a product to the Cart, a **pop up message** letting the App User know that **the business is closed**.

## 05) ADD MORE THAN ONE FLAT RATE SHIPPING [IMPROVEMENT]

Currently, there isn't a way to **add additional Flat Rate shipping options**. For example, "Expedited" (or Rush) Shipping.

Most platforms enable the ability for the App User to select Regular (Standard) Shipping, or Rush (Expedited) Shipping. And there's normally a higher fee for the expedited service.

Add ability to add more than one Flat Rate Shipping Service

## 06) ALL DATA FIELDS MUST TRANSFER TO MIGAPRINT [IMPROVEMENT]

Please ensure that **all data fields are transferred to MigaPrint**. This will enable the business owner to only have to check one location for all of the order information.

## 07) ERROR TITLE INCORRECTLY DISPLAYED WITH E-WALLET [BUG]

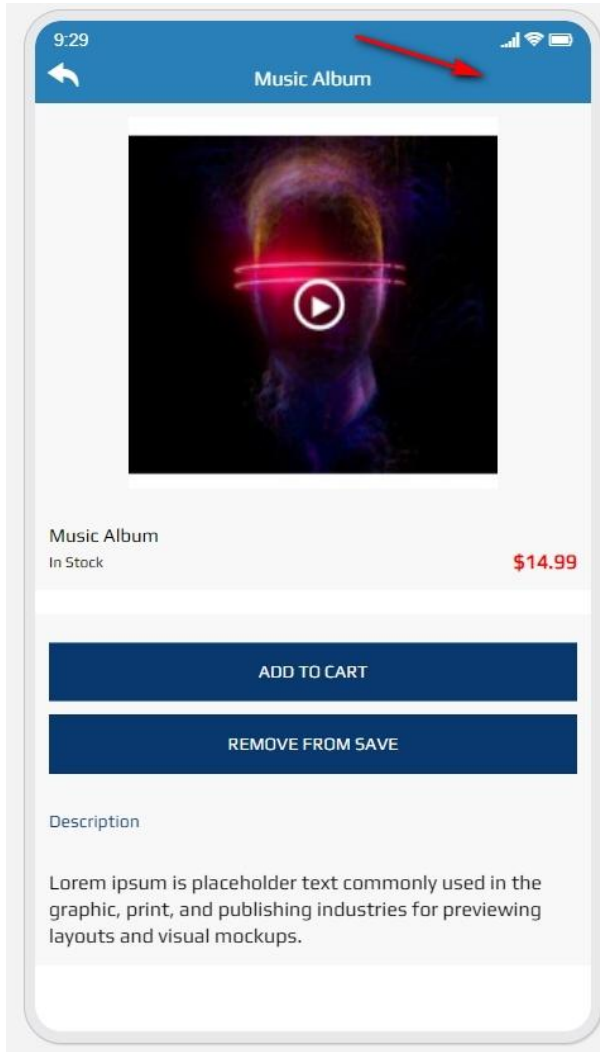

When **using E-Wallet** as the Payment Method, the **Page Title** says **“Error”** even though the **Order is Successfully** placed.

## 08) HOME ICON ON PRODUCT, ORDERS, AND CATEGORY PAGES [IMPROVEMENT]

The **Home Icon** needs to be added to the **Product, Orders, and Category pages** so that the App User doesn't have to make 3 and 4 clicks just to get back to the Main Page.

Also, there should be a **toggle in Settings** that enable the App Admin to select whether the Home Icon should take the App User to the **App's Home Page** or to **xDelivery Home Page**.

## 09) ICON INDICATION THAT ITEMS ARE IN CART [IMPROVEMENT]

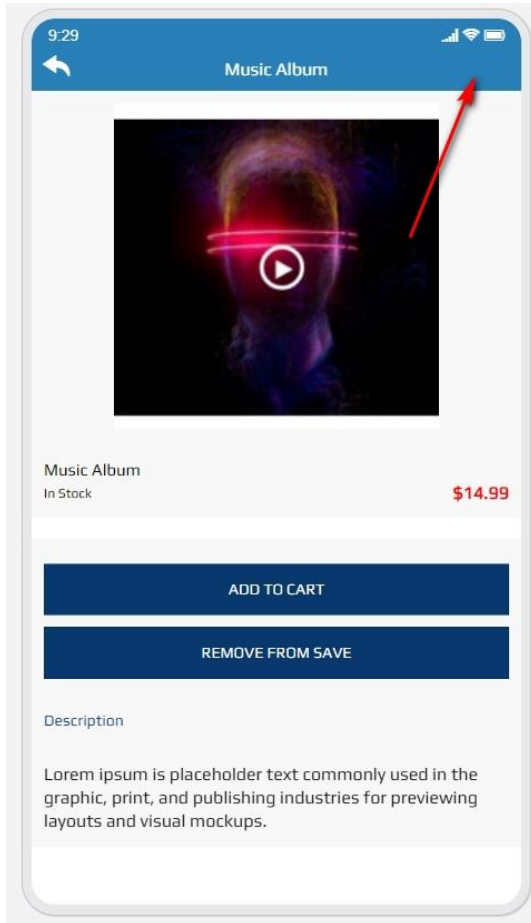

Currently, there isn't a way for the App User to know that they have items in their Shopping Cart. The icon should change or **show an indication that items have been placed in the Cart.**

## 10) ADD SEARCH, HOME AND CART ICONS TO PRODUCT PAGE [IMPROVEMENT]

Currently, the **Product Page** is missing the header icons: Search, Cart and Home.

## 11) ADDITIONAL STATUS CHANGE OPTIONS [IMPROVEMENT]

Add ability for the App Admin to **add additional Status Change options** to the default options that are currently available. This will enable the App Admin to further customize the module to fit their individual needs.

## 12) PUSH NOTIFICATION ON ORDER STATUS CHANGE [IMPROVEMENT]

When the **App Admin** changes the **Order Status**, a **Push Notification** should be sent to the **App User**. There should also be a **Toggle** for the **App Admin** to **Enable/Disable** the **Notifications**.

The Individual Push Notification would probably be required in order for this feature to work.

### 13) ABILITY TO CHANGE FRONT-END LANGUAGE [IMPROVEMENT]

Add the **ability for the App Admin to change the Front-End Language that the App User sees**. This is very important because it allows each Admin to change the language for their local environment.

### 14) TOGGLE TO DISABLE CHECKOUT AND ADD TO CART [IMPROVEMENT]

Add a **Toggle in Settings to Enable/Disable the “Checkout/Add To Cart” process**. This will enable xDelivery to also serve as a Catalog module.

If Disabled, there should also be a **Toggle to Enable/Disable the Price Display**.
